

The Tree

Place a drop of Vetiver in the palm of your hand, with both hands, make a tent above your nose. Inhale and exhale three times in order to ground yourself.

Imagine yourself in a circle that represents space and time (stating today's date).

Observe the state of your tree and the land on which it is located.

In order to observe how your tree may change, depending on your thoughts; what happens when you think of your job, your father, your mother, when you are doing your groceries, when thinking of world peace, gratitude? Etc..

Think of the Divine Spirit taking up the whole space and observe what happens.

Now think of the Divine Source of Love that circulates throughout your tree and observe what happens.

Ask that the roots go all the way down to the center of the Divine Love of the Earth and allow the energy to circulate throughout the Tree.

Ask the tree to show you what it looks like when it is in perfect harmony.

Ask your tree to show you how it tells you yes and how it tells you no.(pendulum)

Ask if we remember that we have come to earth to be in peace and be happy.

Ask if parts of you have not experienced Peace, Happiness, regardless of space-time, beliefs and experiences.

If yes, ask that those parts of you go into the violet circle (that you have 'placed' before you or on the side of you)-along with all the luggages, in order to receive a gift.

Each of the "personalities" (beliefs, situations, experiences etc..) in the circle become conscious of divine love within them, making them grow, which will bring comprehension, forgiveness, freedom and healing.

Each part becomes lighter and lighter and rises to detach from the earth in order to continue to evolve at their pace and onto a plane that is right for them, along with their guide.

While observing your tree, count from 1-12 in order to harmonize the 12 minerals in your body. Picture your guides as they pour the proper amount necessary for you.

Thank them for the support that you receive.

You can work with your tree for your home, for your health etc..

The questions vary according to your specific situation or needs.

You may also pass by the store if you help with practicing your tree.

This exercise is a simple way to take back your power, make choices by observing what the Tree would look like if you took a certain decision.

House Tree

Ask to see your house tree. Observe the state it is in, stating the date of the day.

Ask that the Divine Love circulate throughout the Tree, down to its roots at the center of the earth's divine love.

Ask that all of which is present in the Tree that no longer belongs at this date and time, be removed from the Tree, with all their baggages, in order to go into the violet circle (located before the tree) in order to receive "a gift"...regardless of space-time, beliefs, and experiences.

As this is a divine order, all of which no longer belongs, needs to leave.

Divine love invites them to leave and clears up the space by re-harmonizing the place with divine love.

Once all (that is no longer needed) is in the circle, ***the gift is that the divine love grows inside them, giving them insight, forgiveness, freedom and healing.***

They become lighter and lighter and slowly disconnect from the earth, in order to further evolve along with their guide on the plane that is right for them, and at the rhythm that is right for them.

Ask that an angel at the door take all their burdens, sending them to be recycled and transformed into Love.

Ask that another angel be present who will offer a gift to all those who come to your house!

Visit every room of the house and program every door.

Lastly, say Thank-You for everything!
